

Poison Centres Notification

Since January 1st, 2021, Annex VIII amending Article 45 of CLP has been applicable for consumer and professional uses. To help you comply with this major regulatory update, we, at Lisam, offer a comprehensive solution to manage the Annex VIII requirements in the best possible way.

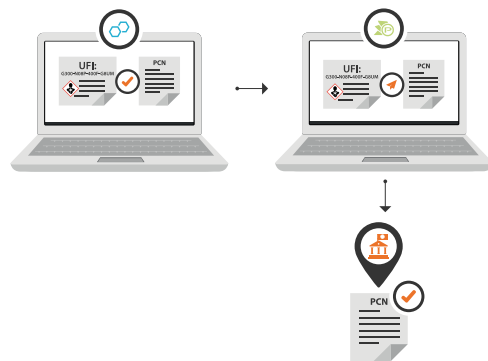

PCN Application Timeline:

Overview of the Lisam Solution

The Lisam PCN Package Includes:

- UFI generator;
- European product categorisation system integration;
- Dossiers generation in PCN format (ready for submission);
- System-to-system (S2S) transfer to submit automatically the PCN dossiers to the ECHA Submission portal.

Thanks to its PCN Wizard, ExESS helps you to easily generate the UFI numbers and prepare your dossiers.

PubliChem will enable the automated distribution of the PCN dossiers to the ECHA submission portal.

How can we help with PCN Compliance?

UFI

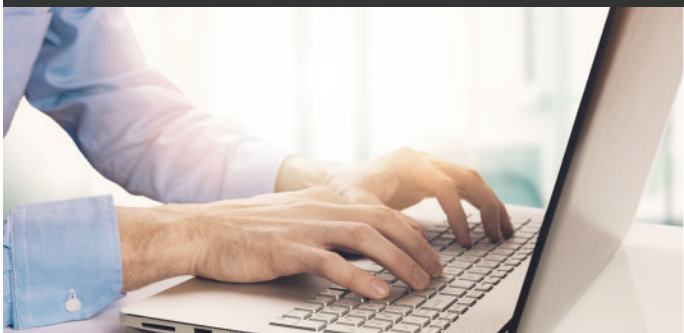

- Printing of the generated UFI numbers on your SDS and labels;
- Tracking of the required UFI updates;
- Automatic assignment of the formulation and VAT Numbers when generating the UFI.

PCN

- Automatic mapping with the product data already present in ExESS (no need to enter the data twice);
- Implementation of the PCN validation rules;
- Tracking of the PCN dossiers updates;
- Custom mapping available.

Lisam closely monitors and analyses the PCN updates (*Annex VIII Amendments, PCN format, EuPCS list, PCN validation rules, etc.*) to ensure their fast implementation in ExESS. The PCN module is continuously updated to guarantee round-the-clock compliance.
