

# LISAM SYSTEMS

Global IT Solutions in Environment, Health & Safety

## ExESS® Basic Module

With ExESS Basic Module, gather all your data in a secured database to easily organize and manage all your EH&S information.

### Compilation of Inventories

Thanks to its flexible structure, ExESS allows you to efficiently manage your company data, from regulatory lists to contact details.

## Creation of customized reports

Use your integrated data to generate specific reports in the format your need and easily customize the templates to be in line with your customers' requirements.

## Your Solution for Environmental Management

Thanks to the use of an SQL Database, perform high speed queries to immediately retrieve any information from large amounts of records. The database can simultaneously be shared with several users to make sure your team members can access the required data at any time, an essential option for enabling and facilitating the internal communication.

**Flexibility**

**Reliability**

**Experience**
